

The Line Clamp is designed to securely hold the Slick-E-Line® for a longer period. The clamp has a precision engineered wire retaining groove to minimize risk of damaging the coating of wires.

**Application**

The Line Clamp is specifically designed to grip around the Slick-E-Line® wire in order to prevent any movement.

These clamps are primarily designed to hold the wire in tension above closed BOP's during fishing operations.

The internal wire locating groove has been machined with tight tolerances to ensure a secure fit but also not damage the coating on the wire.

There is a single certified shackle point incorporated into the design for holding the clamp in position.

Part Number:	A1205566	
Wire diameter	4.06 mm	0.160"
Max. load rating	1000 kg	2200 lb
Bolt Torque Value	14.5 Nm	10.7 lb/ft
Weight	4,0 kg	8.8 lb
Materials	Corrosion resistant throughout
