

With this cross over sub, the Hunter Production Logging Tools can be mechanically as well as electrically connected below the Slick-E-Line® toolstring. The Cross over can be placed directly below any Paradigm PPU. The data from the PLT tools is sent to surface via the ParaComm system. The Hunter PLT data will be visualized in ParaLog and ParaOffice. The PLT will also be stored in the memory of the PPU for back up post job processing.

Available Hunter PLT tools	
1	CFT (without full-bore spinner connected)
2	CFT
3	FDT
4	GCL
5	IFM
6	QPT
7	XYC

Part Number:	A1205867	
Diameter	43 mm	1 11/16"
Overall length	436,9 mm	17.2"
Make up length	385mm	15.15"
Weight	2.2 kg	4.8 lb

Temperature rating	175°C	347°F
Pressure rating	103.4 MPa	15,000 psi
Top connection	ParaComm thread BOX	
Bottom connection	1 3/16" – 12 UN	
Materials	Corrosion resistant throughout
