

The Slick-E-Line® Central Junction Box is one of the available central boxes of the ParaComm communication system. They are used to provide both power and communication to the ParaComm DP panel, ParaComm antenna and ParaSheave, but also to communicate with the logging computer with ParaLog. The box is fitted with connectors to fit the cable assemblies to all particular equipment items.

There is also an explosion proof version available (A1205319)

<b>Part Number:</b>	<b>A1206730</b>	
Dimensions (W x H x D)	300 x 300 x 210 mm	
Weight	Approx. 8 kg	4.5 lb

Temperature rating	-40 / +60°C
Electrical supply	12 VDC
Electrical connections	Supply cable with plug Connector to Antenna Connector to ParaComm DP panel Connector to External Ethernet
Ex marking	None
Ex standards	-
